of the hills was becoming in marminary frequent that he was decremed to check it. If possible. The man, through his codesal, beyond in merch as to had an aged father and a write and challent dependent apon him for upper. He was entended to the Fantains for its mentals.

Thomas Hogan, convicted of assault and unitary, was then houself to the bear. The Recorder remarked that the settlingsy in this case was very conflicting, and the defendant was more rejured in the afterny than the complainant. He was seed \$10.

Charles Ross, convicted of an acquivated associate Charles Ross, convicted of an action and been and beltery, was then brencht other ber. The accined and been absolutely, was then brencht other ber. The accined and been absolutely shown make of a rowdy assault upon an accelerating man, and the Court in presentancing sentence, said. This rowdy is made to Court in presentance is the Court in the South as and so long as I make the Court in the bench of this city, account a shall be wanting both a seal on the bench of this city, account and efficient check, was my part to meet if which most declares and efficient check. I mitted to do all in my power, while I hold a seal here, to be a seal to the court in the seal walking in the street as seen as our breacheds. The make walking in the street as seen as our breacheds. The

scale walking in the street is sent to the Penilentiary sentence of the Court is that you be sent to the Penilentiary for sixy days and pay a fine of \$25.

John W. Paramore pleaded guilty to forgery in the John W. Paramore pleaded guilty to forgery in the Month degree, in forging a sheek. Mr. Spencer arged that the most have been dealed with the sent account, young man was the son of a wealthy planter in Accounte County, young man was the son of a wealthy planter in Accounte County, young man was the son of a wealthy planter in Accounted County, young man was transmissionable the section has him heme and reform him. Upon these representations, has him heme and reform him. Upon the accounted the Court decided to suspend sentence, and basished the accounted the Court decided to suppose the section of the harm, convicted of Jeremiah Flyrin, quite a young man, convicted of Jeremiah Flyrin, quite a young man, convicted of Jeremiah Flyrin, quite a young man, convicted of Jeremiah Flyrin, quite as young man, convicted of Jeremiah Flyrin, and the Jeremiah Flyrin, quite as young man, convicted of Jeremiah Flyrin, quite as young man, conv

John Niles, a young man of respectable appearance, bering plead gointy to assault and battery, was, at the interconflor of his wife, a very presty indy, allowed to depart, the Court an-maing extence. He was warmed, however, that a repetition of treatment toward her would be sufficient cause for his re-arrest

A Frenchman named Monnai pleaded guilty to recaiving stolen goods. The Recorder remarked: "Except the
erimes of arsen and murder, there is no erime in community of
so grere and dangerous a character as that of a receiver of stolen
spoots. One of its worst attendants is the strong inducements
if heade ent for the hopeiess corruption of numbers of young
children." The Court sentenced the accused to the Peniterthey for two years and two months.

Many Forbes plended guilty to an attempt at grand
loseur, and was sentenced to the State Privan for two years and
two mouths. In response to this sentence Many and, "I am
anticled," to which the Court replied, "I thought you would be."

Elizabeth Crawford plended guilty to forcery in the
tourth degree (passing counts right money on the John Hancotte.

rth degree (passing counterfelt money on the John Hancot ch, Masa.), but through the benevolent interession of Mi sle and others she was let off with a sentence to the Penter John Murphy, a boy indicted for rape, but convicted

John Murphy, a noy materior as a property of assest and battery, was sentenced to six months in the Penicatiary. The Court said the prisoner had seduced a more could not succeptable that introduced a number of his companions there and in the course of a few months had mined the girl for the The Court having disposed of all the prisoner plant when sentences were pending, Mr. John Graham, assessed with Mr. Charles T. Spencer in defense of several person believe for selling policy tickets, rose and asked the Court to quality the distribution of the sentence of the court of counts for senior points. Mr. Graham addressed the Court for nearly an hour in support of his motion, grounding his argument shield on the assumption that the accused had been guitty of no offense, and that the law against policy dealing was unconsistent Mr. Graham having finished his argument, the Court decided to postpone the further hearing of counsel till next Wednesday, at 18t a. m., at the Recorder's office, in Chumbers street, when Mr. Sedgwick will reply in behalf of the people, to whom Mr. Graham will also reply, he having the closing as well as the origins argument in the case. There being no further business before the Re-torder, the Court then adjourned for the term.

COURT OF SPECIAL SESSIONS-FEB. 20.- Before Justices

OBBORN AND SPECIAL SESSIONS—FIR. 20.—Before Justices OBBORN and BROWNELL.

The entire number of cases on to-day's calendar was 34—19 prison cases, 2 suspended cases, and 13 osti cases.

Jane, wife of James Mills Smith, and daughters law of Renel
Smith of this city, aged 31 years.

TAYLOR—On Saturday afternoon, Feb. 20, after a short and
severe librase, Wim. C. Taylor, in the 52d years fine are.

The resilives not friends of the family are respectfully invited to
attend his forcers on Thesday, 25d not, at 11 o'clock, from his
late residence, No. 220 Thumpson effect. His remains will be
taken to Fishlands, Long Island, for intermed.

TUCKER—At Norwich, Gonn., on Friday, Dec. 11, Decision B.

TUCKER-At Norwich Conn., on Fridry, Dec. 1', Denison B. Tucker, in the folia year of his age.

EUTTER-INDUCEMENTS TO IMPROVE

Siz: Under the above caption you lately gave your readers some interesting facts, for which we are grateful, but should be more so and they not been so tantalizing. You state, what none better know than we farmers, that much of the buttersent to your market is of poor quality. You show that a superior quality will command 14 cents per pound more than the poor, and wooder that, with such "inducements," we still send you poor butter. When you know the truth you will wonder that farmers ever send you any but poor, since wooder that farmers ever send you any but poor, since farmers, who alone can remedy the evil, can get in their country markets but two cents a pound more for A No. I butter than for staff inferior to good lard. It pays best to make poor butter, or, rather, we are not paid for making it good. Fourteen cents would pay very well for the exira care and laber necessary to produce a good article, but two cents does not. If dealers will offer producers a fair remuneration, even half of 14 cents, they will get an availanche of finest squality of rolls. So, pray devote your next lecture to a dealers rural and urban, and tell them that when they will bury, as well as sell, discriminatingly, the fountain of evil will be reached and rectified. Till then we must be allowed to know on which side our bread is buttered, and feel deeply for, but not with, the city consumer.

Boston Centre Vates Co. N. Y.

Consumer.

Rentes Centre, Yates Co., N. Y. We concede to our friend that much of the evil may be with the butter merchant, but not all. In short, we do not believe that any butter-maker ever makes a poor article purposely, and we do believe that a diference of two cents a pound would be sufficient to induce every butter-maker to make a good article if they knew how; but they do not, and it is for the same reason that we, here in the city, are cursed with badly-cooked food. The cooking and butter making of America is very largely in the hands of Irish girls, who are as ignorant of the chemistry of cooking and buttermeking on the cows that furnish the milk, and most unfortunately for the owners of said come on well as the eaters of butter, a very large proportion of the American girls are just as ignorant of the business as the lish, and a goodly number of the present generation of farmers' wives make no pretense to a knowledge of the art of buttermaking, and intrust the whole operation to Biddy, who is perfectly satisfied with a production of sour butter-milk, without regard to the quality of the other part of the churning product. No advance of price will ever cure the evil of bad butter. In fact, we suppose the evil is incurable.

Streets of a Young Girt .- The Providence Post mentions the suicide, in that city, of a young wom named Abby Webb, by taking arsenic on Sunday named Abby Webb, by taking are nic on Sunday in a cup of coffee. The cause was an old one—disappointed love. After receiving the attentions of a young man, and forming a decided attachment on her purt, he transferred his attentions elsewhere. A little time before she died he was summoned to her presence, and with great reluctance came. As he approached her bedside, says The Post, she caught him in her arms, and as she held him in that last embrace, her arms unclasped, the girl was dead.

DESTRUCTION OF A COLLEGE.—A fire occurred at Plaquemine, La., on the night of the 6th inst., resulting in the complete destruction of the Immaculate Conception, the Catholic Church, and the parsonage thereunto attached. The loss is estimated at about \$40,000.

Since Jan. 1, 1856, 3,000 school-houses have been built in the State of Illinois. This fact, added to the N. Y. Central, Soi; Erie, 34; Rock Island, 80; Gadefection of Judge Douglas, is a mos uninous Democratic prospects in that State. | Washington Rep.

Hesitation was a preminent feature in operation at the morning Board, the feeling seeming to prevail that there had been too satisful rapidity in the advances recently established, and that consequently some moderste rebound would . wene; thus far, however, these calculations upon the n Mural results of unusual specu-lative excitement, have proved entirely fallacious—the upward movements progressing with giant strides— while the retrograde steps, or reactions, have scarcely been noticeable. There are still strong bull cliques of the Beard, and a large majority of the brokers are firm calculations upon the a Mural results of neusnal specu-

believers in a riring market, but here and there the bear feeling breaks out occasionally, and a few operators of the class are takely commencing upon new lines of short steek by sales at the option of the seller; but these rather prematere movements have no parceptible effect upon the market, which after an occablens panse becomes more rampant and excited than before, carrying all opposition before it and swallowing up stocks with apparently insatiate stomach in blocks of any magnitude. The outside force of operators, augmenting daily, is now more powerful than at any time since the recovery of prices commenced, and the tide of stock speculation has acquired strength and volume enough to carry the Stock Exchange along in the current, even against the will of its members. Speculative movements outside of the Board, or rather outside of the circle of those who follow the stock business exclusively, are always for the rise, and when fully developed are almost uncontrolable on an easy money market. The first operations are in the sound dividend-paying securities, partly for permanent investment and partly for temporary employment of capital in channels which promise productiveness in enbanced market value, as well as in dividende; next in sympathy follow movements in the fancies, which more easily stimulated-run up with elastic steps, and grow more tempting as they prove profitable. At this point intrinsic merits cease to be considered—the question only is, whether a successful speculation is practicable in this er that stock, or among the guerilla forces the only thing desirable to know, is whether a movement in any stock is in embryo or in progress, and if the questions are favorable in either case, the rush commences, and carries everything before its impetuesity and strength. In this position stands the New-York Stock market now, feverish and excitable in the highest degree, but almost entirely in a direction toward advance. In other words, buoyancy and confidence are the prominent characteristics of the market-and croaking avails nothing against these strong elements of speculative excitement.

Transactions at the First Board were large. Cum-

beriand led off on the fancy list at a material decline, touching 18] before the call closed, and contributing to some extent to the slight depression in other stocks which followed in regular order. The movements in this stock appear to be somewhat mysterious, some alleging that some of the clique have proved treacherous, and quietly parted with their stock, while others look upon the whole thing as a part of the plan of the campaign. Canton was active and firm at an advance of 1 P cent over previous quotations. This Company have obtained legislative action empowering them to sell their property and receive payment in stock, and to use their funds in the purchase of their stock. Under this authority, they have already purchased 1,000 shares, and other parties are buying for the purpose of making payments to the Company for the lands purchased. New-York Cen-tral was dull and a fraction lower, attracting less attention/than usual. The books of this Company reopen on Tuesday next, and a busy time among the brokers is anticipated, as the transactions for the opening have been very heavy. Erie was the strongest and most elastic stock on the list, running up to 321 at the close, with a quick demand. Reading was active. but not firmly sustained, the result of operations on the call being a decline of | from opening sales. Michigan Southern declined | + cent, but was stendy at the close. Hudson River fell off 1 & cent, as compared with Friday's quotation, but was in better request in the last transactions. Toledo was firmly maintained. Galena and Rock Island were both lower-the former selling down to 931 on a small lot, and the latter declining to 78, though in demand at the close. Panama was heavy for the moment-s leading operator selling 1,000 shares, b 30, at 103 in a single lot. Milwaukee and Mississippi opened at 371 but improved, and was in request afterward at 381. After the adjournment there was a rallying movement in the street, and the whole tone of the market changed, and at the Second Board there were lively movements upward again. Erie jumped up to 341 or moderate sales, and was afterward done in the street as high as 31]. New-York Central advanced |. Hudson River recovered fully from the morning's decline, and there was a slight improvement also in Michigan Southern, Rock Island, Toledo and Panama. The rally was effected with but slight effort. For Bonds the market was steady; the largest transactions were in Missouries. We notice sales of Hannibal and St. Joseph Rail road Bonds at 60, and of the Rending new loan at 71 For Michigan Central new loan 991 was bid, 100 asked. Milwaukee and Mississippi 2d Mortgage sold at 75, which is an improvement of 21 f cent. La Crosse Land Grant 8 & cents sold at 34 in the morning, but at the Second Board were in fair demand at | P cent ad vance. After the Second Board the market was still higher, and closed strong at the following quotations: lena, 94; Toledo, 471; Michigan Southern, 261; Cum-

berland, 19; Rending, 611, &c. The Africa brings important items of financial intelligence. The Bank of England has reduced its minimum to 3! F cent, and continues to be above the rates in the open Money market. The weekly return of the Bank shows a further increase of £394,972 in coin, and the coffers are likely to be filled to overflowing by steady arrivals of the precious metals from Austrails (\$7,500,000 now due), the United States and the West Indies. The applications for discount at the Bank continue light, and in the open market the rates are 2] to 2] P cent, at which quotations the supply is very abundant. Consols had advanced, and were quoted at 96%. No better syidence of the abundance of Money in England can be turnished than is contained in the significant paragraph which announces that subscriptions were invited for £1,184,000 6 P cent debentures of the Grand Trunk Railway of Canada which were all taken up in one day at 97. The swallowing up of a six-million-dollar subscription in a single day is something to talk about, after such a severe depression as we have witnessed in Railway bonds. Whoever enters into the calculation of cost, resources, &c., of the Grand Trunk Railway. embracing in its gigantic programme the construction of an iron tubular bridge across the St. Lawrence at an enormous expense, will not besitate to believe that the Erie, Illinois Central Michigan Southern and other roads, will be entirely successful in placing their new leans. Cotton is firm-Breadstuffs dull. The Bank of Prussia had reduced its rate to 4 & cent. The London Times has a very stupid paragraph in regard to the abundance of money, in which it argues that there is no danger of inflation, but rather of continued de pression, not only on account of the distrust which prevails in regard to mercantile transactions, but as to the management of public companies. Judging from the rush for Grand Trunk Railway debentures, the probable success of Eric and other loans, &c., we are inclined to think the Thunderer is a little slow in its calculations, and, unless we misinterpret the signs of the English Money market, the writer of the paragraph in question is destined to be astonished within the thirty or sixty days following at the contradiction which the speculative movements in that quarter

will be likely to furnish. The return from the Bank of England for the week ending Feb. 3 gives the following results when compared with the previous week:

On the other side of the account:
 Correspondent securities
 £5,590,161
 Increase
 £271,561

 Other securities

It will be noticed that the Baltic was brought home by Capt. West. Capt. Comstock, her commander, left her in Liverpool to proceed to St. Petersburg for the purpose of endeavering to sell the ships of this line to the Russian Government. The North Star, which was to have sailed to-day, was withdrawn for repairs. Some of her officers, we understand, refused to go to sea in her.

The Money Market still exhibits the plethoric as pect last described. The Banks are taking all the good paper they can find, and have been buyers in the street for lack of sufficient applications of a satisfactory quality. Rates in the open market range from 627 P cent for paper of select grade, and in exceptional cases quotations as low as 5 P cent are given. There is but little new paper created, except by the large auction sales, and a large portion of the offerings in the open market are of this character. The Bank returns for the week will doubtless show a considerable increase in the specie reserves, as the California remittance is included in the count, and the export of coin has been small. The last returns, too, were made upon a rising average. On call, the offerings of money are very large at from 5 to 6 \$ cent, according to the standing and credit of the borrower.

The Minnesota Mining Company are making extremely satisfactory progress in their mining operations. The mails, about three weeks since, brought intelligence of the discovery of another monster mass of copper, which from all appearances was larger than the first, although that is estimated at over 500 tuns. This second mass is four feet thick. The mail just arrived brings accounts of still another monster mass which has been exposed on the lower level, running into the conglomerate, which is to all appearances as large as either of the others. The finding of three pieces of nearly pure copper, containing an aggregate of over 1,500 tuns, is something in the history of copper mining worthy of record. The product of these mines for 1857 was 2,057 tuns-an average mouthly yield of 1711 tuns, and an increase of 199 tuns over the product of 1856. The Stamp Mills made, during the year 1374 tuns, being about 6] F cent of the whole product. There were 1,685 masses of copper raised. The total yield of copper since the mine was opened to Jan. 1, 1858, has been 7,626 tans. The dividend will be declared at the annual meeting in March. The value of copper produced in the past year is estimated at

The Separintendent of the Bank Department yes terday submitted a report upon the condition of Sav ings Banks, under a requirement adopted by the last egislature, that those institutions should report to him thereafter instead of to the Legislature. In the

course of his remarks, the Superintendent says; it will be observed, on an examination of the gen-eral summary presenting the condition of all the Savings in the State, the following items, lavested according to their harters beyond all doubt; but not the legitimate investments of Savings Banks, in the legitimate investments of Se opinion of the Superintendent.

Amount leared upon personal security. \$21,046
Amount leared or deposited under the schedules furnished by the Superintendent. 50,462
Miscellaneous resources. 17,199 \$38,690 This, says the Superintendent, appears small, when

This, says the Superintendent, appears small, when an aggregate excess of resources over habities of nearly \$2,500,000 is shown by the aggregate statement; revertheless, the investments alluded to above are radically wrong, and the evidence of the fact is shown by their existence mainly among the smaller and weaker institutions. He recommends:

First: The passage of an act making the investments by Savings Banks uniform throughout the State.

State.

Second: To prevent any bank of discount and deposit, representing itself as a Savings Bank, when a chartered Savings Bank is in existence in the place.

Third: To prevent Savings Banks from loaning on

recoal security.

Fourth: Allowing a majority of trustees to remove a trustee who shall absent himself from regular meet-

ings without good excuse.

The aggregate resources and habilities of the Savings Banks of the State, as shown by their reports, are; #43.865,991 Resources 43,055,991 Liabilities 24,030,443 43,885,991 24,830,443 26,541,682 Liabilities 43,859,991
Amount deposited during the year 1857 28,850,481
Amount withdrawn during the year 1857. 26,541,682
The number of open accounts on the 1st January, 1858, was 203,804. Amount due depositors \$41,422,672.

Average \$203 24. At Philadelphia the Money market continues very

easy and business slowly reviving. The same feature obtains at Boston, with more activity in stocks. At Cincinnati discounts are 10 € 12 \$\psi\$ cent, and the supply of money increasing. At New-Orleans there i also an accumulation of money, and strictly first-class paper goes at 10 211 F cent. Lower rates are looked

The report of the Maine Bank Commissioners states the capital stock of all the banks in operation at \$7,521,200. Four banks during the year have gone into the hands of receivers, viz: City Bank and Grocers' Bank, both at Bangor; Hancock Bank at Ellsworth, and Sanford Bank at Sanford. The Commissioners are convinced that there are too many banks in the State, and they suggest the means of lessening their number as rapidly as those who hold charters may be disposed to relinquish them. The actual outstanding funded debt of Virginia on

the 1st of January, 1858, was \$27,273,880 45. This includes \$970,000 hypothecated by the agent of the Board of Public Works in the city of New-York, to secure loans to the amount of \$670,000. The State has productive investments amounting to \$4,885,855, and unproductive amounting to \$25,313,613. The total of both sorts is \$30,199,469. Of the productive stocks \$3,346,950 are bank stocks. The remaining \$26,852,-519 of the commonwealth's investments are in stocks of and loans to internal improvement companies. Of these but \$1,538,905 are productive. Of the unproductive (\$25,313,613) only the sum of \$4,958,339 is secured by mortgage or otherwise. The remainder consists of stock to the amount of \$10,437,617 in improvements not yet completed, and \$9,917,657 in improvements completed, but still unproductive. The minority of the Finance Committee of the Legislature have reported in favor of issuing no more coupon bonds, and as far as practicable those already issued shall be called in; and the old style registered certificates substituted therefor. The report is also adverse to the policy of issuing any more bonds with provisions for the payment of interest in New-York or London.

The Boston Traveler says:

"We saw yesterday a large sheet, purporting to be a \$1,000 bond of the Pennsylvania Coal Company. It was got up with costly plates, and makes a very handsome show, even the coupons, payable fi New-York, being elaborately executed. Money was advanced on this bond in this city, and when it was sent to New-York it was pronounced spurious. So much pains must have been taken in getting up these plates that probably a large issue has been made. The first coupon does not purport to be payable till Sept. 1, 1858. The Boston Traveler says:

The Bonds purport to be issued by the Pennsylvania

Coal Company. Markete....CAREFULLY REFORTED FOR THE N. T. TRIBUNE.
SATURDAY, Feb. 20, 1858.

ASHES—The demand for both kinds is moderate, but the market is steady; sales of Pots at #6 25, and Pearls at #6 50.

Saleratus is firm at 6c. cash.
COTTON-The market is steady, at our former quotations, with sales of 2,000 hales, chiefly for export. We quote:

We wrong CLASSIFICATION.

Uplands. Florids. Mobile. N. O. and Tex.
104. 104. 104. 104.

fair, in part for export, and, with finited arrivals, prices tend upward; the sales are 19,000 bath at 70c. for Southern Yellow, and 70271c. for do White; old is norman.

HOPS are very quiet; we quote new at 4@7c.; old are without movement.

HOPS are very quiet; we quote new straint, not are without movement.

HIDES—We hear of further sales of \$,000 Orinoco, mostly at 20c. 6 mos. 500 Para, 24 h. at 14 c. 6 mos., and 4,800 African, on terms not made public. We take from H. D. Hull's Circular (which appeared to-day under a new and tasteful arrangement) the following:

Day HIDES—The continued light imports which, up to date, are fully 175,000 Hides less than for the same period last year, has given a firmer tone to the market, although during the fore part of

Day Hibrs—The continued light imports which, up to date are fully 175,006 Hides less than for the same period last year, has given a firmer tone to the market, although during the fore part of the week, the demand was very languid. On Thursday, with a better demand from the trade, an advance of le. was obtained on few parcels offering, and sales, for this reason, have been during the parcels offering, and sales, for this reason, have here had all few parcels offering, and sales, for this reason, have here the importers refuse to offer their atocks, for which, in view of the light expected seceptra, they are consident of obtaining better prices in the Spring. The shipments from Buenos Ayres for this market, in November, comprise 17,000 Dry Ox and Cow Hides, none of which have as yet arrived. Our stock of this description of fildes is much reduced, and chiefly held above the market. HAY—The demand is moderate for shipment, owing to the storm, the arrivals are light; sales of 200 bales at 65@75c. p. 160 fb.

the Have-The demand is moderate for shipment, owing to the storm; the arrivals are fight; sales of 200 bales at 65@75c. \$\text{P}\$ 100 lb.

Lime is still nominal, there being no stock in first hands.

MOLANSES—New-Orleans has further advanced 5c. \$\text{P}\$ railon, with sales of 250 bbls, at 30@35c.—generally at the latter figure. Foreign is unchanged.

NAVAL STORES—Spirits Turpentine continues in fair request, and with a stock reduced to 1,000 bbls, the masket is quite booyant, and the tendency is still upward; sales of 300 bbls., on the spot, at \$\text{P}\$ cash. Holders are now asking 56c. and sales of 75 bbls, in shipping order, are reperted at this rate. Crude is still linactive, owing to the measur supply offering and the high prices demanded. Common Rosin is in good request at \$1.45; most holders ask more money, but buyers are reluctant to accede to their demands. We notice further also of 1,000 bbls, at \$1.45 \text{P}\$ 30 lb, delivered. The medium and fine grades well slowly as wanted at unchanged rates. Tar is firm at the improvement, but the demand is less animated.

OILS—Linseed is in moderate request to the regular trade at 58c., cash; sales of 4.00035,000 galions from crushers' hands at this rate. Crude Whale continues languid, but prices do not very. Refined sells dowly at 66@75c. 4 mos., for Winter Beached. Crude Sperm is less active, but prices for the moment are sustained. Refined Winter commands \$1.90\text{P}\$ 135 P galion, 4 mos. Other kinds are in limited request, but prices are nominally the same.

PREVISIONS—The demand for Pork for consumption is quite light, with increased arrivals in prospect; the trade hold off, and prices were lower at the close; the sales are 470 bbls. at \$1.600 kbls. at \$2.000 kbls. at

blis and ton at \$10000. Butter is in fair demand at 170001a for Ohio, and 1807200 for State. Cheese is saisble at 640001. RICE—The market is active and brougast for the brites cades rices of 500 ton at #3 250001 Pl 00 D, and a small set of 2500 very choice long head at 5.
SYEDS—The demand for Clover used is life for expect; the sales are 40 bibs, and bars at highly of H for Jersey. Tuneding seed it is moderate supply, and from at #2 37 0.000 The bars of 400000 Be. Rough Flax seed is in fair demand at \$100000 Be. Rough Flax seed is in fair demand at \$1000000 Be.

of 4.046 fb. Roogal From the Country of Section 2014 fb. 2 f

an active inquiry.

TALLOW—The market is better, and the tendency improved:
allow of 20.000 fb at 111, and 115 since refused for prime Con.

WHISKY—The market is steady, the demand fair, sales of
